

Prithvi Chauhan

Product Manager

945-216-3238 | Dallas, TX | Prithvi.shaktichauhan@gmail.com | [LinkedIn](#) | [Portfolio](#) | [Github](#)

PROFESSIONAL SUMMARY

- Product Manager who took Copart, the world's largest online vehicle auction marketplace, from 20 disconnected insurance partners to a single automated integration pipeline, unlocking 100,000+ additional vehicles for sale in 6 months.
- 3+ years of product management experience and 5+ years total across product, business analytics, and enterprise platforms — building B2B marketplace integrations, seller tools, data pipelines, and internal AI tooling that replaced manual work with repeatable processes.
- Strong collaborator across engineering, QA, operations, and business stakeholders; experienced in Agile execution, backlog prioritization, sprint planning, product discovery, UAT, and data-driven decision-making.

TECHNICAL SKILLS

Product Management: Product Strategy, Product Discovery, Roadmapping, Backlog Prioritization, User Stories, Sprint Planning, UAT, Agile, Scrum, Stakeholder Management

Analytics & Data Engineering: SQL, Python, Power BI, Tableau, Google Analytics, FullStory, Alteryx, Dataiku, AWS (Redshift, S3, Glue), Snowflake

Product & Design: Jira, Confluence, Figma, Claude

AI & Emerging Technologies: Llama3, LangChain, LlamaIndex, RAG Architecture, FAISS, Streamlit

WORK EXPERIENCE

Product Manager | Copart | Dallas, TX

Mar 2023 - Present

Copart runs the largest online marketplace for salvage and used vehicles, connecting insurers, dealers, and buyers.

Tech: Jira, Confluence, Figma, SQL, Python, Google Analytics, FullStory, Power BI, Tableau, Alteryx, Dataiku, AWS (Redshift, S3, Glue), Snowflake

- Connected 20 insurance carriers to Copart's marketplace via automated data integrations with their claims systems (Guidewire ClaimCenter), replacing manual entry. Owned requirements through weekly engineering/QA syncs across 20 parallel integrations, delivering 100,000+ new vehicle listings across the US and Canada in 6 months.
- Architected end-to-end ETL/ELT pipelines in Alteryx Designer and Dataiku DSS across AWS Redshift, S3, Glue, and Snowflake, processing 10M+ transactional records daily; built validation and reconciliation logic that lifted data accuracy to 99% and automated 30+ hours/month of manual financial reporting.
- Built an internal AI assistant (LangChain, LlamaIndex, Llama 3, FAISS, Streamlit) so engineers could search codebase and integration docs in plain English instead of digging through GitHub, cutting new-engineer ramp-up time from one week to two days.
- Built a tool that automatically stripped sensitive customer data from production API responses to create safe, reusable test data, replacing a manual, error-prone process and speeding up integration testing and debugging.
- Replaced a fully manual bidding-limit process in three Middle East markets (UAE, Oman, Bahrain) with automated, country-specific rules and live currency conversion, cutting 5+ hours of daily manual work to zero.
- Redesigned the UK seller workflow (MAO 2.0) so sellers could review, negotiate, and accept pre-auction offers directly in-platform instead of over email and phone.
- Built a custom buying workflow for Copart's largest customer in 2 weeks flat, growing that account's business by 30%.

Business Analyst | Cipla Ltd. | India

Nov 2019 - Nov 2021

Cipla is one of India's largest pharmaceutical manufacturers, selling medicines through regional distribution and sales teams.

Tech: SQL, Python, R, Tableau, Power BI, Alteryx, Dataiku

- Dug into regional sales data to find underperforming territories and why, then built the targeted rep strategy leadership used to close the gap, lifting sales 30% in those regions.
- Partnered with BI engineers to define success metrics and built the dashboards leadership used to spot problems in real time instead of waiting for month-end reports.
- Built Dataiku and Alteryx workflows feeding regional finance and sales dashboards, translating requirements from finance, compliance, and sales leadership into data models; improved forecast accuracy by 15% and helped avoid roughly \$500K in excess inventory costs.
- Built the financial case for moving Cipla's data sanitization work (stripping sensitive patient/pricing data before external sharing) in-house instead of outsourced, cutting costs by roughly USD 200,000 per quarter.

EDUCATION

Master of Science, Business Analytics | University of Texas at Dallas

Jan 2022 - Dec 2023

Bachelor of Technology, Civil Engineering | Manipal University Jaipur | India

Apr 2015 - Jul 2019
