## Product Manager

945-216-3238 | Dallas, TX | [Prithvi.shaktichauhan@gmail.com](mailto:Prithvi.shaktichauhan@gmail.com) | [LinkedIn](#) | [Portfolio](#) | [Github](#)

### PROFESSIONAL SUMMARY

- Product Manager who took Copart, the world's largest online marketplace for vehicle auctions and remarketing, from 20 disconnected insurance partners to a single automated integration pipeline, unlocking 100,000+ additional vehicles for sale in 6 months.
- 3+ years of product management experience and 5+ years total across product, business analytics, and enterprise platforms, building B2B marketplace integrations, seller tools, and internal AI tooling that replaced manual, one-off work with repeatable processes.
- Strong collaborator across engineering, QA, operations, and business stakeholders, experienced in Agile execution, backlog prioritization, sprint planning, product discovery, UAT, and data-driven decision-making.

### TECHNICAL SKILLS

**Product Management:** Product Strategy, Product Discovery, Roadmapping, Backlog Prioritization, User Stories, Sprint Planning, UAT, Agile, Scrum, Stakeholder Management

**Analytics:** SQL, Python, Power BI, Tableau, Google Analytics, FullStory

**Product & Design:** Jira, Confluence, Figma, Claude

**AI & Emerging Technologies:** Llama3, LangChain, LlamaIndex, RAG Architecture, FAISS, Streamlit

### WORK EXPERIENCE

**Product Manager | Copart | Dallas, TX**

Mar 2023 - Present

*Copart runs the largest online marketplace for salvage and used vehicles, connecting insurance companies, dealers, and buyers who bid on vehicle inventory.*

**Tech:** Jira, Confluence, Figma, SQL, Python, Google Analytics, FullStory, Power BI, Tableau

- Connected 20 insurance companies ("carriers") to Copart's marketplace by building automated data integrations with their claims systems (Guidewire ClaimCenter), so vehicles they needed to sell after an accident or total loss flowed into our platform automatically instead of by manual entry. Owned the process end to end, from gathering requirements to running weekly syncs with engineering and QA across 20 parallel integrations. Delivered in 6 months, adding more than 100,000 vehicle listings ("lots") across the US and Canada.
- Built an internal AI assistant (using LangChain, LlamaIndex, Llama 3, FAISS, and Streamlit) that let engineers search our codebase and integration docs in plain English instead of digging through GitHub manually, cutting the time it took a new engineer to ramp up on an integration from one week to two days.
- Built a tool that automatically stripped sensitive customer data out of real production API responses to create safe, reusable test data, replacing a manual, error-prone process and speeding up how fast engineers could test and debug new integrations.
- Replaced a fully manual bidding-limit process in three Middle East markets (UAE, Oman, Bahrain) with automated, country-specific rules and live currency conversion, cutting 5+ hours of daily manual work down to zero.
- Redesigned the UK seller workflow (MAO 2.0) so sellers could review, negotiate, and accept pre-auction offers directly in-platform instead of over email and phone calls.
- Built a custom buying workflow for Copart's largest customer in 2 weeks flat, a fast turnaround that grew that account's business by 30%.

**Business Analyst | Cipla Ltd. | India**

Nov 2019 - Nov 2021

*Cipla is one of India's largest pharmaceutical manufacturers, selling medicines through regional distribution and sales teams across the country.*

**Tech:** SQL, Python, R, Tableau, Power BI

- Dug into regional sales data to find which territories were underperforming and why, then built the targeted rep strategy leadership used to close the gap, lifting sales 30% in those regions.
- Sat with business intelligence engineers to define what "good" looked like for each metric and built the dashboards leadership used to spot problems in real time instead of waiting for month-end reports.
- Built the financial case for moving Cipla's data sanitization work in house (stripping sensitive patient and pricing data from records before they were shared externally), which had been outsourced. Bringing it in house cut costs by roughly USD 200,000 per quarter.

### EDUCATION

Master of Science, Business Analytics | University of Texas at Dallas

Jan 2022 - Dec 2023

Bachelor of Technology, Civil Engineering | Manipal University Jaipur | India

Apr 2015 - Jul 2019
