SUMMARY

Product Manager enabling sales teams and operations at scale through data-driven tools, change management, and cross-functional execution. Proven impact: \$10M+ cumulative revenue, 15%+ conversion lifts, and successful scaling across 5 international markets and 100+ regional sales offices. Expertise: Sales operations alignment, seller enablement, adoption-first product design, and building tools that drive sales productivity. Hands-on with SQL, Python, and analytics—comfortable validating hypotheses and solving sales operational friction independently.

PROFESSIONAL EXPERIENCE

Copart

Product Manager

Dallas, TX

Mar 2023 - Present

- Owned seller adoption strategy for streamlined checkout UX; diagnosed friction points through cohort analysis and user research across buyer segments; designed and shipped seller-centric experience, driving 15% conversion lift and \$2M+ incremental revenue; led adoption through targeted communications and training, achieving 85%+ seller utilization within Q1
- Set and owned OKR to reduce seller churn by 20% across international markets; led discovery research across 5 regions (UK, Oman, Bahrain, Spain, Finland) uncovering localization barriers to adoption; partnered with regional sales operations teams to ship 8 features and GTM strategy, capturing 10% of total GMV and 40%+ YoY EMEA growth—demonstrating ability to align product with distributed sales team needs
- Evaluated APAC market expansion through TAM analysis and competitive research across 6 potential markets; identified product-market fit concerns and unit economics challenges; made strategic recommendation to pause APAC and deepen EMEA—protecting engineering bandwidth for high-ROI seller enablement initiatives and improving unit margins by 18%
- Identified enterprise insurer onboarding as critical operational bottleneck limiting partnership velocity; led product discovery with sales operations and enterprise partners; wrote PRD for Guidewire ClaimCenter integration reducing onboarding from 6 weeks to 2 weeks; managed cross-functional launch with partner enablement materials, enabling \$500K+ partnership revenue and creating repeatable seller onboarding playbook
- Built self-serve analytics platform enabling sales operations team independence; designed dashboards for regional quota tracking, pipeline forecasting, and rep activity metrics; created KPI framework for marketplace efficiency metrics enabling sales operations, risk, and ops teams to independently monitor seller health, conversion rates, and churn signals—reducing ad-hoc reporting requests by 40% and improving sales ops decision velocity from 5 days to 1 day; freed analytics team to focus on strategic initiatives
- Influenced \$2M+ in multi-quarter product allocation decisions by presenting quarterly strategic analysis to C-suite on sales expansion opportunities, competitive positioning, and ROI impact; drove alignment across engineering teams, sales operations, and leadership on roadmap priorities for seller enablement and regional scaling

Cipla Ltd.

Business Analyst (Product & Analytics)

Mumbai, IN

Nov 2019 - Nov 2021

- Partnered with sales leadership to optimize go-to-market strategy across 100+ regional offices; conducted territory-level data analysis identifying 3x variance in sales effectiveness across regions; diagnosed root causes of underperformance (forecast accuracy, territory alignment, sales ops bottlenecks); recommended and implemented GTM redesign; created regional sales effectiveness playbook adopted across all 100+ offices, standardizing territory planning and rep productivity measurement; drove 40% sales growth in target segments within 6 months—demonstrating ability to translate data insights into sales operations improvements
- Designed unified OKR and KPI framework for sales and product teams across 100+ regional offices; built centralized dashboards enabling regional managers to track quota attainment, pipeline health, and forecast accuracy in real-time; improved forecast accuracy by 25% and reduced planning cycles from quarterly to monthly, enabling sales leadership to respond faster to market changes and allocate resources more effectively
- Led modernization of enterprise reporting infrastructure to enable sales operations team self-service; architected data pipeline and Snowflake migration strategy reducing data latency from 24 hours to near real-time; enabled product, sales operations, and ops teams to access real-time seller metrics and make decisions 5x faster, accelerating go-to-market execution for 5 new markets and improving sales team responsiveness

PROJECTS

GitHub Repository AI Chatbot | <https://github.com/prithvi1811/github-repo-ai-chatbot>

Personal Project

- Built AI-powered codebase assistant using RAG architecture and Llama3 to validate hypothesis that developers could save 5+ hours/week with intelligent code documentation; integrated vector embeddings and LangChain, shipped Streamlit interface for index and query workflows; demonstrated proof-of-concept for automating documentation workflows and improving seller/user productivity

SKILLS

- **Sales Operations & Enablement:** Sales Ops Alignment | Seller Enablement | Adoption-First Product Design | Sales Team Scaling | Territory & Regional Planning | Quota & Forecast Optimization | Rep Productivity Metrics | Sales Ops Pain Point Resolution
- **Sales Enablement Tools:** Territory Planning Frameworks | Quota Modeling & Tracking | Rep Activity & Productivity Dashboards | Sales Process Optimization | Partner Onboarding Playbooks
- **Product Strategy & Leadership:** Discovery & Validation | Data-Informed Prioritization | Roadmapping & OKR Definition | GTM Strategy | A/B Testing & Experimentation Design | Stakeholder Management | Enterprise Integrations | Change Management & Adoption at Scale | Cross-Functional Collaboration
- **Technical Fluency:** SQL | Python | Snowflake | AWS | Data Analysis & Visualization | Tableau-Equivalent Dashboarding | Guidewire

EDUCATION

University of Texas at Dallas, TX | *Master of Science, Business Analytics*

Jan 2022 - Dec 2023

Manipal University Jaipur, India | *Bachelor of Technology, Civil Engineering*

Apr 2015 - Jul 2019
